

## PREFACE

The APCEE 2016 conference on Power and Electrical Engineering was successfully held at Thammasat University Rangsit Campus during March 20-21, 2016.

APCEE provided a forum for accessing to the most recent research and experience in the field of Power and Electrical Engineering from academics, industrials, professional with best practice. The conference proceeding will be a real good documents in the power and electrical engineering that can help other researchers, academics, professional engineers working in this field.

The outstanding scientific program provided potential and distinguished keynote materials and also convincing presentations by leaders in various topics of Power and Electrical Engineering. The authors in this field have contributed by valuable works and long outcomes from research in different topics covering “power electronics, control strategy, power system protection, electrical machines, renewable resources, dynamic modeling and high voltage”. All papers including in this proceedings had undergone very extensive peer reviewing via experts before acceptance.

The published papers have knowledge and experiences that will be very valuable for others. By sharing this proceeding will be of great benefits for all. We do believe that ACPEE 2016 conference has the success to be very memorable professional and scientific experience in a unique Power and Electrical Engineering environment.

We would like to thank keynote speakers, invited speakers, authors of this proceeding for their valuable contributions. We would also like to thank all referees for their constructive comments on the papers, all the thanks for the organizing committee for the effort done before and after the conference.

Prof. M M Eissa

Faculty of Engineering, Helwan University at Helwan

# Committees

## International Advisory Board

Prof. Wei SHYY , Hong Kong University of Science and Technology, Hong Kong  
Prof. Miroslaw Wyszynski, University of Birmingham, UK

## Conference Committee

Dr. Nopbhorn Leeprechanon, Thammasat University, Thailand  
Prof. Issa Batarseh, University of Central Florida, USA  
Prof. Chan Siew Hwa, Nanyang Technology University, Singapore  
Prof. Tek-Tjing Lie, AUT University, Auckland, New Zealand  
Prof. Emanuele Calabrò, Institute of Industrial Technology, Italy

## Program Committee

Prof. Somchart Chantasiriwan, Thammasat University, Thailand  
Prof. Zhe Chen, Aalborg University, Denmark  
Dr. Yaser Qudaih, Kyushu Institute of Technology, JAPAN

## International Technical Committee

Prof. Moustafa Eissa, Helwan university, Egypt  
Prof. Chandima Gomes, Universiti Putra Malaysia, Malaysia  
Prof. Mohan Kolhe, University of Agder, Norway  
Prof. Dimitris Labridis, Aristotle University of Thessaloniki, Greece  
Dr. Shaifulazuar Bin Rozali, University of Malaya, Malaysia  
Dr. Shuheng Chen, University of Electronic Science and Technology of China, China  
Dr. Taib Iskandar Mohamad, Universiti Kebangsaan Malaysia, Malaysia  
Dr. Zulfiqar Khan, Bournemouth University, UK  
Dr. Khoa Dang Hoang, University of Sheffield, UK  
Dr. Michael Gschwendtner, AUT University, Auckland, New Zealand  
Dr. Ahmed Zobaa, Brunel University London, UK  
Dr. Khaled Al-Soufi, King Fahd University of Petroleum & Minerals, Saudi Arabia  
Prof. Alejandro A. Franco, Laboratoire de Réactivité et Chimie des Solides, France  
Prof. Abraham Lomi, Institut Teknologi Nasional Malang, Indonesia
