

Preface

The 4th International Building Control Conference (IBCC) is a conference series dedicated to promote the importance, significance and advancement of building control and compliance for construction industry. This conference is deliberately planned for various backgrounds in the Built Environment who are frequently involved in building construction activities. It offers an opportunity for awareness and enhancement of knowledge and to keeping-up with the latest know-how in the field. Several invited guest speaker will be organized for exchanging of idea. Also, a distinguished overseas expert invited to present a keynote lecture on the latest findings on the subject matter.

The organizing committee invites all government officers, practitioners, researchers, academics, professional, students and those interested to participate in the IBCC. This conference is organized by Department of Building Surveying, Faculty of Built Environment, Kuala Lumpur City Hall (DBKL), Royal Institutions of Surveyors Malaysia (RISM), in collaboration with University Kebangsaan Malaysia and University Technology MARA along with its supported organizations.
