

**XV International Conference  
«Topical Problems of Architecture, Civil engineering,  
Energy efficiency and Ecology - 2016»  
TPACEE 2016**

The TPACEE 2016 conference is organized on behalf of Tyumen state university of architecture and civil engineering, the leading centre of Western Siberia, Russia, involved into the development construction and civil engineering technologies.

TPACEE conferences are held annually and bring together the professionals working on the issues of energy-efficient construction, ecology and the Arctic development. The first conference was held in Tyumen in 2000. Since then, the venue remains traditionally unchanged.

Popularity for TPACEE events shows the need for regular special events devoted to energy efficient and environmentally friendly civil engineering solutions, including the construction in the Arctic and permafrost.

Date: April 27-29, 2016

Venue: Tyumen state university of architecture and civil engineering, Tyumen, Russia.

We would like to express our gratitude to Editorial Board of MATEC Web of Conferences and personally Isaline Augusto for your noble effort.
