

## Preface

Dear colleagues, participants of the XXVII Russian-Polish-Slovak Seminar «Theoretical Foundation of Civil Engineering»!

Every year our Seminar becomes more and more popular. This year the greatest number of papers was published in the proceedings.

For the first time the organizers of the Seminar have become 6 universities: Moscow State University of Civil Engineering (MGSU); Wrocław University of Technology (WrUT); Don State Technical University (DSTU); University of Zilina (UNIZA); Warsaw University of Technology (WUT); Samara State Technical University (SamSTU).

Participants of the Seminar are not only representatives of universities-organizers, but also scientists from other research and educational institutions: Belgorod State Technological University Named after V.G. Shukhov; Building Research Institute Filtrowa; Cracow University of Technology; Donbass National Academy of Civil Engineering and Architecture; Lomonosov Moscow State University; Lublin University of Technology; National Research Nuclear University “MEPhI”; Northern Federal University named after M.V. Lomonosov; Russian Academy of Sciences; Russian University of Transport; Southern Federal University; State Higher School Pope John Paul II; Tyumen Industrial University; University of Warmia and Mazury in Olsztyn; Volgograd State Technical University; Voronezh State Technical University; Warsaw University of Life Science; and many others.

This year the Seminar is held at the Don State Technical University (Rostov-on-Don, Russia). We know what responsibilities are assigned to the organizers, especially if they have to do this for the first time. I would like to thank the rector of DGTU B.Ch. Meskhi and vice-rector A.N. Beskopylny, who was a participant of several previous Seminars and is well aware of our traditions.

I am sure that holding a Seminar in different cities allows not only foreign guests, but also all participants to get to know this country, its traditions and hospitality better.

The work of our colleagues from the universities-co-organizers, who provided timely control over the preparation of papers, should also be noted.

Special thanks should be given to the members of the International Scientific Committee, who promptly reviewed the papers

The Russian-Polish-Slovak Seminar «Theoretical Foundation of Civil Engineering», which is being held for the twenty-seventh time, will once again confirm that the meetings of scientists from different countries will expand our scientific potential, strengthen cooperation and friendship between us.

I wish all the participants of the Seminar successful presentations, further success in scientific activities, health and further meetings.

Chairman,  
Prof. Vladimir Andreev, DSc, Full member RAACS
