Preface

Special Issue of Curtin Global Campus Higher Degree by Research Colloquium 2022

This special issue presents a set of 32 selected papers from Curtin Global Campus Higher Degree by Research Colloquium (CGCHDRC) 2022 on the area of Engineering, Science, Business, Social and Health Sciences, and their interdisciplinary topic. CGCHDRC 2022 itself was held at Curtin University Malaysia Campus from 12th to 13th December 2022. This colloquium was also co-organised by Curtin Mauritius, Curtin University Dubai, Curtin Singapore, Curtin University Australia and Curtin Malaysia Postgraduate Research Association. Since the theme of the colloquium is “Contemporary perspectives of Engineering, Business, Social and Health Sciences and Technologies for Post-Pandemic Recovery”, its papers are related to the latest advances and best practices of Engineering and Technologies for Sustainable Development, and Social, Economic, and Health Transformations in a Post-Pandemic Future. Each paper in this special issue had undergone double peer review to ensure its quality. We believe that this issue will serve as a book of knowledge and an essential literature, which will lead to not only knowledge generations but also translational research ideas. We express our gratitude to the authors, reviewers and editors of this journal who make the publications of these papers possible.

KEYWORDS: CGCHDRC 2022, Contemporary Perspectives, Engineering and Sciences, Business, Social and Health Sciences, Post-Pandemic Future

Scientific Editors:
Agus Saptoro (Curtin University Malaysia), Ramasamy Nagarajan (Curtin University Malaysia), John Lau Sie Yon (Curtin University Malaysia), Tiong Ying Ying (Curtin University Malaysia), Vikash Rowtho (Curtin Mauritius), Chithirai Pon Selvan (Curtin University Dubai), Adrian Tan (Curtin Singapore), and Carolyn Koh (Curtin Singapore)

Managing Editors:
Ting Qian Hui (Curtin University Malaysia) and Melvin Wee Xin Jie (Curtin University Malaysia)
